

NEW PRODUCT BULLETIN

Heavy Duty Grade 1 Cast Aluminum Commercial Door Closer
for High-Traffic Entrances/Doorways/Aluminum Storefronts

Model LH816

Your solution to high foot traffic entrances and exits.

Whether at a school, store, condo, healthcare facility, factory, office, and other buildings, people are streaming in and out all day. You need a reliable, durable method of controlling security and maintaining the building's doorways especially where there is increased usage. Facilities managers and custodians are using these door closers to replace worn-out closers installed in millions of buildings throughout North America.

Worry free security, with automatic closing and latching

Allow complete freedom of movement in/out of your space while knowing security and quiet will be automatically restored as the door closes on its own.

In box:
